

Trading 101 — Beginner Foundation

Curriculum Document

Level: Absolute Beginner

Goal: Develop a basic understanding of trading and financial markets

Approach: Simple concepts → visual examples → small interactions → basic simulations

Course Overview

Module	Topic	What Students Learn
1	What is Trading?	What trading is, why people trade, and the basic difference between trading and investing
2	Understanding Financial Markets	What a stock market is, the basic purpose of markets, and the role of buyers and sellers
3	Types of Financial Assets	A basic introduction to stocks, currencies, commodities, and cryptocurrencies
4	How Does a Trade Work?	The basic role of buyer, seller, broker, and exchange; how a trade gets executed
5	Basic Trading Terms	Fundamental terms such as buy, sell, profit, loss, price, quantity, and order
6	Introduction to Charts	What a chart is, why price is shown on a chart, and basic chart reading
7	Reading a Simple Price Chart	Identifying the X-axis, Y-axis, time, and price
8	Introduction to Candlesticks	What a candlestick is and what a single candle represents at a basic level
9	Understanding Price Movement	The basic concept of price moving up or down and the influence of buyers/sellers
10	Time in Trading	A basic idea of different time periods — intraday, short-term, and long-term
11	Profit & Loss Basics	How profit/loss is calculated in a trade, with simple examples
12	Introduction to Trading Risk	Why loss is possible in trading and why protecting capital is important
13	Your First Simulated Trade	The student observes and executes a simple simulated trade
14	Trading Basics Challenge	Applying the course concepts in an interactive beginner assessment

What This Course Does Not Cover

Trading 101 does not include deep technical analysis, support/resistance, market structure, indicators, complex candlestick patterns, leverage strategies, advanced risk management, or strategy building.

These topics are covered in dedicated future courses.

Learning Experience

Each module can be designed roughly around the following flow:

Learn → **See** → **Interact** → **Practice** → **Quick Check**

Example: “What is a Candlestick?”

- 2-minute explanation
- Visual animation
- Inspecting the candle
- Simple question: “Did the price go up or down in this candle?”
- AI-generated feedback

This ensures the student is not given 20 new terms or concepts at once.

Core Outcome

By the end of the course, the student should ideally be able to say:

“I know what trading is, how a financial market works at a basic level, who is involved in a trade, what a chart shows, what a basic candlestick is, how price moves, and how profit/loss works in a simple trade.”

Trading 101 Philosophy

“First understand the market. Then learn to analyze it.”
